

# IR 2030 - UK Interface Requirements 2030 Licence Exempt Short Range Devices

Publication date: December 2011 98/34/EC Notification number: 2011/0401/UK

#### Contents

#### Page Section References Foreword Minimum requirements for operation within the UK Additional performance parameters Contact details Document history

### Section 1 References

- 1.1 EN 300 220-1 European Norm Electromagnetic compatibility and Radio spectrum Matters (ERM); Short range devices; Technical characteristics and test methods for radio equipment to be used in the 25 MHz to 1 000 MHz frequency range with power levels ranging up to 500 mW; Part 1: Parameters intended for regulatory purposes.
- 1.2 EN 300 220-2 European Norm Electromagnetic compatibility and Radio spectrum Matters (ERM); Short range devices; Technical characteristics and test methods for radio equipment to be used in the 25 MHz to 1 000 MHz frequency range with power levels ranging up to 500 mW; Part 2: Supplementary parameters not intended for regulatory purposes.
- 1.3 EN 300 220-3 European Norm Electromagnetic compatibility and Radio spectrum Matters (ERM); Short Range Devices (SRD); Radio equipment to be used in the 25 MHz to 1 000 MHz frequency range with power levels ranging up to 500 mW; Part 3: Harmonized EN covering essential requirements under article 3.2 of the R&TTE Directive.
- 1.4 EN 300 328-1 Electromagnetic compatibility and Radio spectrum Matters (ERM);Wideband Transmission systems; Data transmission equipment operating in the 2,4 GHz ISM band and using spread spectrum modulation techniques; Part 1: Technical characteristics and test conditions
- 1.5 EN 300 328-2 Electromagnetic compatibility and Radio spectrum Matters (ERM);Wideband Transmission systems; Data transmission equipment operating in the 2,4 GHz ISM band and using spread spectrum modulation techniques; Part 2: Harmonized EN covering essential requirements under article 3.2 of the R&TTE Directive.
- 1.6 EN 300 330-1 Electromagnetic Compatibility and Radio Spectrum Matters (ERM); Short Range Devices (SRD); Radio equipment in the frequency range 9 kHz to 25 MHz and inductive loop systems in the frequency range 9 kHz to 30 MHz; Part 1: Technical characteristics and test methods
- 1.7 EN 300 330-2 Electromagnetic compatibility and Radio spectrum Matters (ERM); Short Range Devices (SRD); Radio equipment in the frequency range 9 kHz to 25 MHz and inductive loop systems in the frequency range 9 kHz to 30 MHz; Part 2: Harmonized EN under article 3.2 of the R&TTE Directive.

1.8 EN 300 422-1 European Norm - Electromagnetic compatibility and Radio spectrum Matters (ERM); Wireless microphones in the 25 MHz to 3 GHz frequency range; Part 1: Technical characteristics and test methods. 1.9 EN 300 422-2 European Norm - Electromagnetic compatibility and Radio spectrum Matters (ERM); Wireless microphones in the 25 MHz to 3 GHz frequency range; Part 2: Harmonized EN under article 3.2 of the R&TTE Directive. 1.10 EN 300 440-1 Electromagnetic compatibility and Radio spectrum Matters (ERM); Short range devices; Radio equipment to be used in the 1 GHz to 40 GHz frequency range; Part 1: Technical characteristics and test methods. Electromagnetic compatibility and Radio spectrum Matters 1.11 EN 300 440-2 (ERM); Short range devices; Radio equipment to be used in the 1 GHz to 40 GHz frequency range; Part 2: Harmonized EN under article 3.2 of the R&TTE Directive. 1.12 EN 300 674 European Norm - Electromagnetic compatibility and Radio spectrum Matters (ERM); Road Transport and Traffic Telematics (RTTT); Technical characteristics and test methods for Dedicated Short Range Communication (DSRC) transmission equipment (500 kbit/s / 250 kbit/s) operating in the 5,8 GHz Industrial, Scientific and Medical (ISM) band. 1.13 EN 300 718-1 Electromagnetic Compatibility and Radio Spectrum Matters (ERM): Avalanche Beacons: Transmitter-receiver systems: Part 1: Technical characteristics and test methods. 1.14 EN 300 718-2 Electromagnetic compatibility and Radio spectrum Matters (ERM); Avalanche Beacons; Transmitter-receiver systems; Part 2: Harmonized EN covering essential requirements of article 3.2 of the R&TTE Directive. 1.15 EN 300 718-3 Electromagnetic compatibility and Radio spectrum matters (ERM); Avalanche Beacons; Transmitter-receiver systems; Part 3: Harmonized EN covering essential requirements of article 3.3e of the R&TTE Directive. 1.16 EN 300 761 European Norm - Electromagnetic compatibility and Radio spectrum Matters (ERM); Automatic Vehicle Identification (AVI) for railways. 1.17 EN 301 091-1 Electromagnetic compatibility and Radio spectrum Matters (ERM); Short Range Devices; Road Transport and Traffic Telematics (RTTT); Radar equipment operating in the 76 GHz to 77 GHz and 24 GHz range; Part 1: Technical Requirements and methods of measurement.

- 1.18 EN 301 091-2 Electromagnetic compatibility and Radio spectrum Matters (ERM); Short Range Devices; Road Transport and Traffic Telematics (RTTT); Radar equipment operating in the 76 GHz to 77 GHz and 24 GHz range; Part 2: Harmonized EN covering essential requirements of article 3.2 of the R&TTE Directive.
- 1.19 EN 301 357-1 European Norm Electromagnetic compatibility and Radio spectrum Matters (ERM); Cordless audio devices in the range 25 MHz to 2 000 MHz; Consumer radio microphones and inear monitoring systems operating in the CEPT harmonized band 863 MHz to 865 MHz; Part 1: Technical characteristics and test methods.
- 1.20 EN 301 357-2 European Norm Electromagnetic compatibility and Radio spectrum Matters (ERM); Cordless audio devices in the range 25 MHz to 2 000 MHz; Consumer radio microphones and inear monitoring systems operating in the CEPT harmonized band 863 MHz to 865 MHz; Part 2: Harmonized EN under article 3.2 of the R&TTE Directive.
- 1.21 EN 301 839 1 Electromagnetic compatibility and Radio spectrum Matters (ERM);Short Range Devices (SRD);Ultra Low Power Active Medical Implants (ULP-AMI) and Peripherals (ULP-AMI-P) operating in the frequency range 402 MHz to 405 MHz; Part 1: Technical characteristics and test methods
- 1.22 EN 301 839 2 Electromagnetic compatibility and Radio spectrum Matters (ERM);Radio equipment in the frequency range 402 MHz to 405 MHz for Ultra Low Power Active Medical Implants and Accessories; Part 2: Harmonized EN covering essential requirements of article 3.2 of the R&TTE Directive
- 1.23 EN 301 893 Broadband Radio Access Networks (BRAN);5 GHz high performance RLAN; Harmonized EN covering the essential requirements of article 3.2 of the R&TTE Directive
- 1.24 EN 302 195 1 Electromagnetic compatibility and Radio spectrum Matters (ERM);Radio equipment in the frequency range 9 kHz to 315 kHz for Ultra Low Power Active Medical Implants (ULP-AMI) and accessories; Part 1: Technical characteristics and test methods
- 1.25 EN 302 195 2 Electromagnetic compatibility and Radio spectrum Matters (ERM);Radio equipment in the frequency range 9 kHz to 315 kHz for Ultra Low Power Active Medical Implants (ULP-AMI) and accessories; Part 2: Harmonized EN covering essential requirements of article 3.2 of the R&TTE Directive
- 1.26 EN 302 208-1 European Norm Electromagnetic compatibility and Radio spectrum Matters (ERM); Radio Frequency Identification Equipment operating in the band 865 Hz to 868 MHz with

power levels up to 2 W; Part 1: Technical requirements and methods of measurement.

- 1.27 EN 302 208-2 European Norm Electromagnetic compatibility and Radio spectrum Matters (ERM); Radio Frequency Identification Equipment operating in the band 865 Hz to 868 MHz with power levels up to 2 W; Part 2: Harmonized EN under article 3.2 of the R&TTE Directive.
- 1.28 EN 302 288-1 Electromagnetic compatibility and Radio spectrum Matters (ERM); Short Range Devices; Road Transport and Traffic Telematics (RTTT); Short range radar equipment operating in the 24 GHz range.
- 1.29 EN 302 288-2 Electromagnetic compatibility and Radio spectrum Matters (ERM); Short Range Devices; Road Transport and Traffic Telematics (RTTT);Short range radar equipment operating in the 24 GHz range.
- 1.30 EN 302 291-1 Electromagnetic compatibility and Radio spectrum Matters (ERM);Short Range Devices (SRD);Close Range Inductive Data Communication equipment operating at 13,56 MHz; Part 1: Technical characteristics and test methods
- 1.31 EN 302 291-2 Electromagnetic compatibility and Radio spectrum Matters (ERM);Short Range Devices (SRD);Close Range Inductive Data Communication equipment operating at 13,56 MHz; Part 2: Harmonized EN under article 3.2 of the R&TTE Directive
- 1.32 EN 302 372-1 Electromagnetic compatibility and Radio spectrum Matters (ERM);Short Range Devices; Equipment for Detection and Movement; Tank Level Probing Radar (TLPR) operating in the frequency bands 5,8 GHz, 10 GHz, 25 GHz, 61 GHz and 77 GHz; Part 1: Technical characteristics and test methods.
- 1.33 EN 302 372-2 Electromagnetic compatibility and Radio spectrum Matters (ERM);Short Range Devices; Equipment for Detection and Movement; Tank Level Probing Radar (TLPR) operating in the frequency bands 5,8 GHz, 10 GHz, 25 GHz, 61 GHz and 77 GHz; Part 2: Harmonized EN under article 3.2 of the R&TTE Directive.
- 1.34 EN 302 510-1 Electromagnetic compatibility and Radio spectrum Matters (ERM);Radio equipment in the frequency range 30 MHz to 37,5 MHz for Ultra Low Power Active Medical Membrane Implants and Accessories; Part 1: Technical characteristics and test methods
- 1.35 EN 302 510-2 Electromagnetic compatibility and Radio spectrum Matters (ERM);Radio equipment in the frequency range 30 MHz to 37,5 MHz for Ultra Low Power Active Medical Membrane

Implants and Accessories; Part 2: Harmonized EN covering essential requirements of article 3.2 of the R&TTE Directive

- 1.36 EN 302 536 -1 Electromagnetic compatibility and Radio spectrum Matters (ERM);Short Range Devices (SRD);Radio equipment in the frequency range 315 kHz to 600 kHz; Part 1: Technical characteristics and test methods
- 1.37 EN 302 536-2 Electromagnetic compatibility and Radio spectrum Matters (ERM);Short Range Devices (SRD);Radio equipment in the frequency range 315 kHz to 600 kHz; Part 2: Harmonized EN covering essential requirements of article 3.2 of the R&TTE Directive
- 1.38 EN 302 537-1 Electromagnetic compatibility and Radio spectrum Matters (ERM);Short Range Devices (SRD);Ultra Low Power Medical Data Service Systems operating in the frequency range 401 MHz to 402 MHz and 405 MHz to 406 MHz; Part 1: Technical characteristics and test methods
- 1.39 EN 302 537-2 Electromagnetic compatibility and Radio spectrum Matters (ERM);Short Range Devices (SRD);Ultra Low Power Medical Data Service Systems operating in the frequency range 401 MHz to 402 MHz and 405 MHz to 406 MHz; Part 2: Harmonized EN covering essential requirements of article 3.2 of the R&TTE Directive
- 1.40 EN 302 567 Broadband Radio Access Networks (BRAN);60 GHz Multiple-Gigabit WAS/RLAN Systems; Harmonized EN covering the essential requirements of article 3.2 of the R&TTE Directive
- 1.41 EN 302 608-1 Electromagnetic compatibility and Radio spectrum Matters (ERM);Short Range Devices (SRD);Radio equipment for Eurobalise railway systems; Harmonized EN covering the essential requirements of article 3.2 of the R&TTE Directive
- 1.42 EN 302 609-1 Electromagnetic compatibility and Radio spectrum Matters (ERM);Short Range Devices (SRD);Radio equipment for Euroloop railway systems; Harmonized EN covering the essential requirements of article 3.2 of the R&TTE Directive
- 1.43 EN 302 686 Intelligent Transport Systems (ITS);Radiocommunications equipment operating in the 63 GHz to 64 GHz frequency band;Harmonized EN covering the essential requirements of article 3.2 of the R&TTE Directive
- 1.44 EN 302 858-1 Electromagnetic compatibility and Radio spectrum Matters (ERM);Road Transport and Traffic Telematics (RTTT);Short range radar equipment operating in the 24,05 GHz to 24,25 GHz frequency range for automotive application;Part 1:

Technical characteristics and test methods

- 1.45 EN 302 858-2 Electromagnetic compatibility and Radio spectrum Matters (ERM);Road Transport and Traffic Telematics (RTTT);Short range radar equipment operating in the 24,05 GHz to 24,25 GHz frequency range for automotive application;Part 2: Harmonized EN covering the essential requirements of article 3.2 of the R&TTE Directive
- 1.46 EN 305 550-1 Electromagnetic compatibility and Radio spectrum Matters (ERM);Short Range Devices (SRD);Radio equipment to be used in the 40 GHz to 246 GHz frequency range;Part 1: Technical characteristics and test methods
- 1.47 EN 305 550-2 Electromagnetic compatibility and Radio spectrum Matters (ERM);Short Range Devices (SRD);Radio equipment to be used in the 40 GHz to 246 GHz frequency range;Part 2: Harmonized EN covering the essential requirements of article 3.2 of the R&TTE Directive

## Section 2 Foreword

- 2.1 It is required by the Wireless Telegraphy Act 2006 that no radio equipment is installed or used in the UK except under the authority of a licence granted by or otherwise exempted by regulations made by Ofcom. This document contains minimum requirements for the **establishment**, **installation and use** of licence exempt short range devices in the UK in the specified frequency bands.
- 2.2 The Radio Equipment and Telecommunications Terminal Equipment Directive 99/5/EC (R&TTE Directive) was implemented in the United Kingdom (UK) on the 8 April 2000 by The Radio Equipment and Telecommunications Terminal Equipment Regulations 2000, Statutory Instrument 2000 No. 730 (the "RTTE Regulations").
- 2.3 Nothing in these UK Radio Interface Requirements shall preclude the need for equipment to comply with Directive 1999/5/EC or the RTTE Regulations. This document does not prescribe technical interpretation of the 'essential requirements' of Directive 1999/5/EC. Nothing in these UK Interface Requirements shall preclude equipment from being **placed on the market** in the UK if it complies with the 'essential requirements' specified in Directive 1999/5/EC.
- 2.4 The requirements in these UK Radio Interface Requirements are made for reasons related to the effective and appropriate use of the radio spectrum in the UK, in particular maximising spectrum utilisation. These UK Radio Interface Requirements will be revised as necessary, for example to take account of:
  - i) current technology developments for reasons related to the effective and appropriate use of the spectrum, in particular maximising spectrum utilisation; and
  - ii) changes to the available spectrum for the use of licence exempt Short Range Devices.
- 2.5 All UK Radio Interface Requirements notified under Directive 1998/34/EC will be published and will be made available free of charge from the Ofcom web-site at <u>http://stakeholders.ofcom.org.uk/spectrum/spectrum-management/research-guidelines-tech-info/interface-requirements/</u>.
- 2.6 Further information on these UK Radio Interface Requirements can be obtained from the technical enquiry contact given at the back of this document.

#### Section 3

# Minimum requirements for operation within the UK

- 3.1 The following Table gives the UK Radio Interface Requirements for licence exempt short range devices. Each row of the Table is to be interpreted in accordance with Sections 2 and 3 of this document.
- 3.2 The "Normative Part" of each row of the Table, including comments, sets out minimum requirements relating to that Interface Requirement. Unless otherwise stated, terrestrial use only is permitted.
- 3.3 The "Informative Part" of each row of the Table and in Annex A is not a part of the Interface Requirement. It gives a reference for relevant technical standards as at the date of publication of these Interface Requirements. The standards are updated from time to time and this may not be reflected in these Interface Requirements.
- 3.4 References to documents in the form "EN 111 111" are references to standards published by ETSI.
- 3.5 Adjacent frequency bands within the Table may be considered as a single frequency band provided the specific conditions of each of these adjacent frequency bands are met.
- 3.6 In this document, the following words shall have the following meanings:
  - i) "Applications" as set out in the first column of the normative part of each Radio Interface Requirement, refer to the purpose of equipment;
  - ii) "dBm" means decibels of power referenced to one milliWatt;
  - iii) "dBµA/m" means decibels of inductive field strength referenced to one microAmp per metre;
  - iv) "duty cycle limit" means the proportion of time during which equipment is actively transmitting within any one hour period;
  - v) "e.i.r.p." means equivalent isotropic radiated power;
  - vi) "e.r.p." means effective radiated power;
  - vii) "ETSI" means the European Telecommunications Standards Institute;
  - viii) "equipment" means wireless telegraphy apparatus or a wireless telegraphy station;
  - ix) "FCMW" means Frequency Modulated Continuous-Wave;
  - x) "Fo" means the arithmetic mean frequency between the lower frequency boundary and upper frequency boundary of a radio spectrum channel;
  - xi) "GHz" means gigahertz;
  - xii) "kHz" means kilohertz;
  - xiii) "MHz" means megahertz;
  - xiv) "mS" means milliSecond;
  - xv) "mW" means milliWatt;
  - xvi) "µW" means microWatt;
  - xvii) "nW" means nanoWatt; and
  - xviii) "W" means Watts.
- 3.7 The following definitions apply in relation to the specified Radio Interface Requirements:

| Number<br>IR2030/17 | Defined term<br>Alarm                 | <b>Definition</b><br>means equipment designed or adapted to generate<br>or indicate an alarm condition; or to arm or disarm an<br>alarm system   |
|---------------------|---------------------------------------|--|
| IR2030/25           | Assistive Listening<br>Devices        | means equipment designed or adapted for telephony,<br>for the purpose of hearing aids for the disabled   |
| IR2030/3            | Databuoy Telemetry                    | means equipment designed or adapted for telemetry<br>in a maritime environment   |
| IR2030/15           | Inductive Applications                | includes devices for car immobilisation, animal<br>identification, alarm systems, cable detection, waste<br>management, personal identification, wireless voice<br>links, access control, proximity sensors, anti-theft<br>systems, data transfers to hand-held devices,<br>automatic article identification, wireless control<br>systems and automatic road tolling |
| IR2030/23           | Model Control                         | means equipment used to control the movement of models   |
| IR2030/29           | Radar Level Gauges                    | equipment designed or adapted for level measurements   |
| IR2030/12           | Radio Determination<br>Applications   | equipment means equipment designed or adapted for<br>use for determining the position, velocity or other<br>characteristics of an object   |
| IR2030/24           | Radio Microphones                     | equipment designed or adapted for telephony, for the purpose of projecting the user's voice or music   |
| IR2030/10           | Railway Applications                  | equipment designed or adapted for the purpose of<br>railway vehicle identification or for the provision of<br>short range data links between the track and railway<br>vehicles   |
| IR2030/18           | Social Alarms                         | equipment for assisting elderly or disabled people when they are in distress   |
| IR2030/30           | Tank Level Probing<br>Radar           | equipment means equipment designed or adapted for<br>measuring the level of the contents of a tank   |
| IR2030/7            | Wideband Data<br>Transmission Systems | equipment for wireless networking between two or<br>more devices   |
| IR2030/8            | Wireless Access<br>Systems            | equipment, including Radio Local Area Networks,<br>designed for high speed data communication  |
| IR2030/26           | Wireless Audio<br>Applications        | includes cordless loudspeakers and cordless<br>headphones  |

| Table     | Description   | Page |
|-----------|---|------|
| IR2030/1  | Non-Specific Short-Range Devices                    | 15   |
| IR2030/2  | Industrial / Commercial Telemetry and Telecommand   | 22   |
| IR2030/3  | Databuoy Telemetry                                  | 24   |
| IR2030/4  | Active Medical Implants                             | 24   |
| IR2030/5  | Animal Implantable Devices                          | 26   |
| IR2030/6  | Medical and Biological Applications                 | 26   |
| IR2030/7  | Wideband Data Transmission Systems                  | 28   |
| IR2030/8  | Wireless Access Systems                             | 29   |
| IR2030/9  | Short Range Indoor Data Links                       | 30   |
| IR2030/10 | Railway Applications                                | 31   |
| IR2030/11 | Devices for locating victims in distress or at risk | 32   |
| IR2030/12 | Radio Determination Applications                    | 32   |
| IR2030/13 | Radio Frequency Identification                      | 34   |
| IR2030/14 | Road Transport and Traffic Telematics               | 36   |
| IR2030/15 | Inductive Applications                              | 39   |
| IR2030/16 | Metal Detectors                                     | 54   |
| IR2030/17 | Alarms  | 55   |

| IR2030/18 | Social Alarms   | 55 |
|-----------|---|----|
| IR2030/19 | Vehicle Paging Alarms   | 56 |
| IR2030/20 | General Alarms Associated With Marine Applications Including Fixed<br>Shore Installations | 57 |
| IR2030/21 | Mobile Transportable and Lone Worker Safety Alarms  | 57 |
|           | Fixed Alarms  | 57 |
| IR2030/23 | Model Control   | 58 |
| IR2030/24 | Radio Microphones   | 60 |
| IR2030/25 | Assistive Listening Devices   | 60 |
| IR2030/26 | Wireless Audio Applications and Low Power FM Transmitters                                 | 61 |
| IR2030/27 | Wireless Video Cameras - Non Broadcasting   | 62 |
| IR2030/28 | Video Distribution for Private Use  | 63 |
| IR2030/29 | Radar Level Gauges  | 63 |
| IR2030/30 | Tank Level Probing Radar  | 64 |

| Interface<br>Number/Notif<br>ication<br>number/Date | Normative Pa                           | ırt  |                           |                               |                                   |   |  |                                     | Informative<br>Part |

#### Section 4

## Annex A. Additional Performance Parameters (Informative)

A.1 For Licence Exempt Short Range Devices operating on radio frequencies between 25 MHz and 1 GHz, with power levels up to 500 mW, the guidance published in EN 300 220-2 should ensure reasonable reliability of the radio link and performance of the receiver.
